

Find your perfect fit

A comfortable ring should sit securely and pass over your knuckle with slight resistance. Use this Indian size reference for the sizes currently offered on our website.

01 Measure a ring you already wear

Choose a ring that fits the intended finger. Measure straight across its inside opening in millimetres, excluding the metal band. Match the diameter below.

02 Check before you choose

Measure when your hands are at a comfortable temperature. Fingers can change size throughout the day. Wide bands can fit more snugly. If unsure, ask a jeweller to measure your finger or contact URAURA before ordering.
